Water Tower Maintenance Project

Location: 16 S West Street

Dear Neighbor,

Camden Wyoming Sewer and Water Authority has contracted Southern Corrosion Control for the rehabilitation of the water storage tank located at 16 S West Street, Camden DE.

While crews will be onsite this week to begin prep work, cleaning will not begin until Monday, July 8, 2024. Weather permitting, we anticipate the project to be completed in approximately 2 weeks. This process will include emptying the water tower, power washing and cleaning of the interior, and power washing, blasting and painting the exterior of the tank. Work will take place Monday – Friday 7:00AM – 7:00PM and Saturday and Sunday 7:00AM – 7:00PM.

Although we understand work will cause a disturbance, we request your understanding and patience during the course of the project.

Painting of the exterior tank will be applied using a dryfall coating. For those residences on Willow Ave (West of West Street) we will have a limited number of disposable car covers available. You may consider parking your car on the other end of Willow Ave (East of West Street) or at the far South side of the fire house parking lot while work is taking place.

Again, thank you for your patience and understanding and we are looking forward to a successful project!

Please feel free to call 302- 697-6372 or email: info@cswa.com with any questions or concerns regarding this project.
